ket would be permitted to pursue its nasay taken from the lead returned gold values of \$189,002.40 a ton.

Arriving in Battle Mountain in a private car a few days ago to inspect the property was a party of large holders of the Nevada-Omaha company, which included A. L. Mohler, vice president and general manager of the Union Pacific railroad; fool W. West, prominent at some printing company; F. Bassinger, assistant general passenger agent of the Union Pacific and Pinting company; F. Bassinger, assistant general passenger agent of the Union Pacific and Mr. Scharman, private secretary of Mr. Mohler. These were taken in automobiles to the scene of the rich discovery and it is said that they were not a little excited by the showing. The property was purchased by the Omaha people about three weeks ago, within ten days after Alexander Walker and Panul Keel had uncovered the bonauza lode, the consideration reported being 350,000.

Plan Vigorous Campaign.

Figure 1910 No. Since the purchase was made W. S. Wilhelm has been placed in charge of the property as general manager, and plans have been laid for a vigorous campaign of development. Six leases have been received for as many more. Terms of the lease granted to Judge J. S. Parker and associates of Reno call for the siking of a 350-foot shaft within inhery days. Lumber and other material are being runder to the camp and the building of boarding houses, blunk houses, blacksmith shop, assay office and other buildings is under the camp and the building of boarding houses, bunk houses, blacksmith shop, assay office and other buildings is under the camp and the building of boarding houses, bunk houses, blacksmith shop, assay office and other buildings is under the camp and the buildings is

assay office and other buildings is under

way.

The Philadelphia canyon property is separated by only the width of one claim from the group of the Iron Canyon Gold Mining company, of which Jesse Fox and associates of this city are the large holders. The Iron Canyon company has opened at intervals for 2,000 feet a vein four and five feet wide, which underneath approximately ten feet of iron capping is filled with a soft carbonate ore carrying uniform gold values of about \$70 a ton. Several shipments of the ore, taken out in doing development work, have been made by that company. The Philadelphia canyon vein parallels the Iron Canyon vein.

TREMONT CAMP

Washington District Said to Be Hub of a Great Mineral Section.

That the Washington district, on the west side of Beaver county, adjoining the Nevada-Utah line, is destined to become recognized as the hub of the great mineral section whose spokes and outward rim are marked by such camps as Pioche, Fay, Gold Springs, Osceola, Black Horse, San Francisco and North Star, is the firm belief of a well known mining man who has just returned to the city after having made a careful inspection of that region of that region.
"Washington is an ideal district as to

location and advantages," said he. "It has an abundance of good water and a great amount of timber for fuel, mining purposes and building. The formation is an altered granite, porphyry and lime, and it is of an old geological date. It is fissured with a network of veins which is fissured with a network of veins which are highly mineralized, giving values as high as 1,600 ounces in silver, \$1.5 per cent lead, 20 per cent copper and \$19.50 in gold. Large bodies of milling ore, running from \$5 to \$30 a ton, have been encountered, and it gives every indication of becoming one of the greatest mineral-producing camps in the west.

"The Utah Gold & Copper company, which, it is said, may again become the Utah Amalgamated Copper company, has

Erie Has Promising Group.

"The property of the Erie Mining company adjoins that of the Utah Gold & Copper company. The Erie has twelve claims, but it has yet done little work. Its shafts and tunnel, to the depth of 50 and 70 feet, show, however, well defined veins with high-grade ore in several places and extensive bodies of sulphides. The company is just being incorporated and is preparing for more active porated and is preparing for more active work. Its property is most promising and with development will no doubt become a

large producer.
"The Florence and other companies, as well as individuals, have made good showings with relatively small outlays. Ninety per cent of the holes where assessment work has been done show good ore at from three feet to ten feet depth.
"The main camp of the district is Tremont. It is on the west slope of the Needle range, 25 miles north of Modena. It is a camp with a great future."

LAY SITE FOR

Springs Mine-Strikes Look Good.

Modena, Sept. 18.—The Gold Springs Railway company are chief owners of the ment of mining stock prices reached bot- Mining & Power company has had a Railway company are chief owners of the Nevada-Omaha Mining company, which a few weeks ago took over the property in Philadelphia canyon, just off Iron canyon, south of Battle Mountain, in which a sensational gold strike has been made. The vein of picture rock, from three to five inches wide when first uncovered, has widened to eleven inches, with only a few feet of depth, it is said, and one assay taken from the lead returned gold values of \$180,002.40 a ton.

Arriving in Battle Mountain in a private car a few days ago to inspect the property was a party of large holders of the Nevada-Omaha company, which included A. L. Mohler, vice president and general manager of the Union Pacific railroad; Joel W. West, prominent attorney of Omaha; Senator Frank T. Rantorney of Omaha; Senator Frank T. Rantorney of Dmaha Printing company; F. Bassinger, local stock market. When comes the end to this debauch of "knocking" it is not unlikely that those who have been foremost in tiwill be loud in calling for assistant general passenger agent of the Union Pacific and Mr. Scharman, private to "broaden the leaders have been selling below apparent real two weeks staking off the site for its new power plant, running a line for some time. The public has been asking that two weeks staking off the site for some time. The public has been asking that two weeks staking off the site for some time. The public has been asking that the leaders have been selling below apparent real wow power plant, running a line for some time realized that the leaders have been selling below apparent real two weeks staking off the site for some time. The public has the leaders have been selling below apparent real wow power plant, running a line for some time. The public has the leaders have power plant site two weeks staking off the site for some time. The public has the leaders have power plant site to the power site, leaders the public has the public has even manipulated for continued lowering of prices is too plain to require elucidation. How much further Nevada-Omaha Mining company, which a tom? The public has been asking that corps of surveyors at Modena the last

Yellow Pine Is Freak Mine and Is to Be a Great Producer.

The Yellow Pine mine, in Good Springs, Nevada district, is a freak mine in that

the company is geting ready for heavy production.

By building a branch line from the vicinity of Jean, the Salt Lake Route could reach the camp with a line about 25 miles long, and it would bring in as shippers not only the Yellow Pine, but the Monte Cristo, the Potosi, the Hoosier, the Nine ty-Nine and perhaps several others.

The Hoosier, Mr. Jenson believes, is the making of another Yellow Pine. It has on the dump now some 300 tons of zinc-lead ore which, with the higher prices of the metals, is of shipping grade, and plans are on foot to make it active. That property, as well as the Ninety-Nine, is owned by James T. Hammond of this city and associates. Mr. Jenson is in the camp for the purpose of starting new work at both

mines.

The management of the Santa Fe rail-road, attracted by the unusual showing in the Good Springs mines, has experts in the district looking up the shipping possibilities, with the idea of building in a branch from the Borax Smith line, or Tonopah & Tidewater. It may forestall the Salt Lake Route in the matter of getting the business.

United States Company Starts Work

company is taking out its pumps. The work has already been started and the hoisting of the machinery will be done at once. It is declared that the pumps were inadequate to care for the water at the mine. Whether the company will install large pumps and continue the work has not been learned.

not been learned.

The water from the Gemini has been utilized by the Tintic smelter. Yard Master Collin McMurphy of the smelter and a gang of men were busy yesterday putting in pipes and machinery for the securing of water from the Eureka Huproperty. The water is needed at the smelter until Oct. 1, when the plant will close down.

close down.

The old mill at the Eureka Hill is fast being torn down and sold. Much of the timber has already been disposed of.
Work has started on the Holden tunnel, which is to be built by the United States company through Bullion-Beck ground to the Centennial-Eureka shaft. Grading was started Wednesday. The old blacksmith shop at the Miller place has been torn down and the cabin is being used as an office.

WILL START WORK ON SNAKE CREEK BORE

Work preliminary to the driving of the long tunnel by the Snake Creek Mining Tunneling company, which is a combination of Daly-Judge and Jesse Knight Interests, is to be started Monday by the building of a tunnel house on the Snake Creek side. The preliminary work is expected to occupy 30 days, by which time arrangements will be completed for driving the big bore. In the event of the complete success of the Karns tunneling machine in the work upon which it is now Tonocah Trengah. chine in the work upon which it is now engaged at Johnstown, Pa., it is not unlikely that a contract will be made with the Utah Karns Tunneling Machine combine the Spake grack tunnel.

Several Companies Have Arrived at Interesting Development Stages.

Considerable new activity in the Gold ountain district is reported by A. B. Devine, a well-known operator of that camp, who is in the city for a few days. While difficulties attending the financing of mining companies, encountered especially during the last two years have retarded development of Gold Mountain properties, several of the companies have reached stages of development where large results may be looked for at any time, and these results are pretty sure to bring the new era of rapid progress which has long been looked for.

"The Advocate Mining company," said Mr. Devine, "is following the vein cut last spring, with values across six and a Boston Conner of the companies have reached stages of development where large results may be looked for at any time, and these results are pretty sure to bring the new era of rapid progress which has long been looked for.

"The Advocate Mining company," said Mr. Devine, "is following the vein cut last spring, with values across six and a Boston Conner of who is in the city for a few days. While

Nevada district, is a freak mine in that its shaft is sunk almost squarely upon the dividing line between a body of lead ore and a body of zinc ore, the two ore bodies being virtually one, except as to the nature of their contents.

And, according to Engineer J. B. Jenson, who has recently visited the property, the Yellow Pine is making a great mine. So large is the tonnage of high-grade ore developed that owners contend that they are in a position to alone provide sufficient business to warrant the building of a railroad to the camp. A new hoist and

a railroad to the camp. A new hoist and crosscut tunnel which is in 600 feet. The compressor have just been installed and the company is geting ready for heavy production.

The Lone The Company is driving a crosscut tunnel which is in 600 feet. The formation is changing to the bird's-eye porphyry and it is believed that almost any shot may disclose the extension of the

INCLINED TO MOVE

Activity in copper stocks continued in Boston yesterday, according to Paine, Webber & Co.'s letter received over the Pollock wire, although, owing to the short period of trading, there were no import-Coalition was well bought and is being talked for higher prices. The operations at East Butte for August were satisfactory and costs are being steadily reduced. The stock was comparatively higher, advancing a point and a quarter, with every indication of higher prices next week.

Notice of Annual Meeting of Stockholders.

NOTICE IS HEREBY GIVEN THAT NOTICE IS HEREBY GIVEN THAT the annual stockholders' meeting of the Selma Consolidated Mining company, a corporation of the state of Utah, is called and will be held in Room 506 Newhouse building, South Main street, Salt Lake City, Utah, on Thursday, the 30th day of September, A. D. 1309, at 12 o'clock noon, the the purpose of electing a board of the for the purpose of electing a board of directors and for the transaction of suc

rectors and for the transaction of such other business as may regularly come before said meeting.

This call is made by the undersigned in pursuance of the provisions of the articles of incorporation of said company, and also because the secretary of said company, to wit, J. O. Carter, has falled and refused and does now fail and refuse to make the call for said meeting, although requested so to do.

requested so to do.

By L. C. PETERSON, WALTER J. POULTON, JR., Stockholder, JOHN ANARGGROS, Stockholder. Dated Aug. 30, 1909.

Notice to Contractors.

EUREKA, UTAH, SEPT. 9, 1909.
